

# Jordi Olsen

## Director, Machine Learning Engineer

Seasoned machine-learning leader with a PhD in quantitative methods and 14 years of end-to-end ML delivery in agritech. Experienced in building scalable MLOps platforms, leading remote teams, and translating research into measurable farm-level impact.

### EXPERIENCE

#### Director, Machine Learning Engineer

Freelance (part-time clients) – Copenhagen, Denmark – 2022 - Present

- Led a distributed team of 4 ML engineers to create a yield-prediction model that lifted forecast accuracy by 18% for a Danish seed supplier, saving ≈€1.2 M in input costs.
- Architected an MLOps pipeline on Kubernetes that cut model-deployment latency from 2 weeks to 2 days across three concurrent agritech projects.
- Advised two Spanish cooperatives on pest-outbreak detection using CNN-based image classification, achieving 92% precision and reducing scouting labour by 30%.

#### Machine Learning Consultant

Freelance – Remote – 2018 - 2022

- Delivered end-to-end ML solutions for six European clients, averaging €250k contract value per engagement.
- Engineered a Spark-based pipeline processing 5 TB of weekly NDVI satellite data, reducing latency from 6 h to 45 min.
- Authored a white-paper on explainable AI for crop disease detection, cited at three industry conferences.

#### Senior ML Engineer

CropX – Amsterdam, Netherlands – 2015 - 2018

- Enhanced the fertilizer-schedule recommendation engine, raising average crop yield by 7% over 12 kha of farmland.
- Mentored three junior engineers and instituted weekly tech talks that lifted team velocity by ~15%.

#### ML Engineer

AgriTech Solutions – Barcelona, Spain – 2012 - 2015

- Built a Prophet-based irrigation-demand forecast that cut water usage by 10% on pilot farms.
- Integrated an IoT-sensor API, boosting data ingestion to 200k events/min.

#### Data Analyst

Finova Bank – Valencia, Spain – 2010 - 2012

- Automated credit-risk reporting with Python/Tableau, shrinking monthly turnaround from 2 days to 4 h.
- Developed a predictive default model (AUC 0.81) adopted in the loan-approval workflow.

### CONTACT

Copenhagen, Denmark

j.olsen@example.com

+45 12 34 56 78

### SKILLS

Machine Learning (TensorFlow, PyTorch, Scikit-learn)

Deep Learning & Computer Vision (satellite imagery, CNNs)

Time-Series Forecasting & Temporal Modeling

Data Engineering (Apache Spark, SQL, Airflow, Kafka)

Statistical Modeling & Experiment Design

MLOps (Docker, Kubernetes, MLflow, Prometheus)

Team Leadership & Agile Delivery

Technical Communication & Stakeholder Management

### LANGUAGES

Catalan (native)

Spanish (fluent)

English (fluent)

Danish (basic)

## EDUCATION

### PhD in Machine Learning for Agriculture, Quantitative / Computer Science

Technical University of Denmark (DTU) (DTU) – 2016

### MSc in Data Science, Computer Science

Universitat Politècnica de Catalunya (UPC) (UPC) – 2010

### BSc in Mathematics, Mathematics

Universitat de Barcelona (UB) – 2008
