SKILLS

Network design
Cisco IOS / Juniper Junos
TCP/IP, MPLS, BGP, OSPF
Wireshark, tcpdump
Linux administration (RHEL, Ubuntu)
Python (Netmiko, Napalm, Ansible)
SNMP, Syslog
VPN (IPsec, SSL)
Firewalls (Palo Alto, Fortinet)
QoS and traffic shaping
Network monitoring (PRTG, Zabbix)
IP addressing and subnetting
Change management (ITIL)
Documentation (Confluence, Visio)

LANGUAGES

Estonian (native)
English (fluent)
Russian (basic)

EDUCATION

**B.Sc. Computer Engineering,
Computer Engineering**
Tallinn University of Technology
(TalTech)
2015

Märt Kollo

NETWORK ENGINEER

PROFILE

Network engineer with five years of experience designing and operating enterprise MPLS and IP networks, skilled in automation, troubleshooting, and security hardening.

EXPERIENCE

Network Engineer

Telia Estonia • Tallinn, Estonia • 2020 - Present

- Designed and deployed an MPLS backbone linking 12 regional offices, increasing inter-site throughput by 40%.
- Automated device configuration backups using Python and Ansible, saving approximately 15 hours of manual work per month.
- Led a VLAN consolidation project that reduced broadcast traffic by 25% and improved network segmentation.
- Implemented BGP route-reflector design, cutting convergence time after link failures from 45 seconds to under 10 seconds.
- Managed capacity planning for peak traffic growth of 22% YoY, avoiding any service degradation.

Junior Network Administrator

Elisa Eesti • Tallinn, Estonia • 2017 - 2020

- Managed daily operations of a campus LAN serving 500+ users, maintaining 99.9% uptime.
- Configured QoS policies that prioritized VoIP traffic, reducing average jitter by 30%.
- Performed quarterly security audits, identifying and patching 15 critical vulnerabilities.
- Upgraded core switches from Cisco Catalyst 2960 to 3850, increasing port density by 50%.
- Created standardized runbooks for common incidents, cutting mean time to resolution by 20%.

IT Support Intern

Latvian State Railways • Riga, Latvia • 2016 - 2016

- Provided desktop and printer support for over 200 staff members during a three-month summer internship.
- Documented the existing network topology for the Riga depot, later used in the upgrade planning phase.
- Assisted in the rollout of a new ticketing system, testing connectivity for 15 point-of-sale terminals.
