Mid-level QA Engineer with six years of experience in test automation, performance testing, and quality advocacy for web and mobile applications.

TECHNICAL SKILLS

- Test automation (Selenium, Cypress)
- API testing (Postman, REST Assured)
- Performance testing (JMeter, Gatling)
- Test management (Jira, TestRail)
- CI/CD integration (GitLab CI, Jenkins)
- Programming (Java, Python)
- SQL basics
- Agile/Scrum

EXPERIENCE

QA Engineer - TechSolutions Iberia

2020 - Present

Granada, Spain

- Reduced regression suite execution time by 40% by migrating tests to Selenium Grid with parallel nodes.
- Increased automated test coverage from 68% to 92% on the core payment module within six months.
- Logged an average of 150+ defects per release, improving defect detection rate by 25% compared to previous quarter.

Contract QA Analyst - QAtest Contracting

2019 - 2020

Remote (Spain)

- Executed manual and automated test cycles for three fintech clients, delivering weekly status reports.
- Created reusable Cypress component library that cut test-authoring time by 30%.

Junior QA Tester - DevStart Studios

2016 - 2019

Málaga, Spain

- Performed functional testing on mobile iOS/Android apps, capturing defects in Jira.
- Assisted in setting up the first continuous integration pipeline using Jenkins.
