

Wang Wei

Backend Engineering Intern

Computer science graduate seeking to apply strong Python and backend development skills in a fast-paced tech environment. Proven ability to deliver reliable APIs and improve system performance through testing and automation.

EXPERIENCE

Backend Engineering Intern

Spotify – Stockholm, Sweden – 2025 - Present

- Implemented a Redis caching layer for the recommendation API, cutting average response time by 15%.
- Wrote over 200 unit tests with pytest, raising backend test coverage from 68% to 85%.
- Automated microservice deployments via GitHub Actions, reducing release cycle from two days to four hours.
- Designed a new PostgreSQL schema for user activity logs that improved query performance by 20%.
- Participated in daily stand-ups and sprint retrospectives, contributing to backlog grooming and task estimation.

Teaching Assistant - Introduction to Programming

KTH Royal Institute of Technology – Stockholm, Sweden – 2024 - 2025

- Assisted lab sessions for 120 first-year students, grading assignments and providing one-on-one help.
- Created supplemental Python exercises that were adopted by the course coordinator for the following term.

EDUCATION

Bachelor of Science, Computer Science

KTH Royal Institute of Technology (KTH) – 2025
