

Michał Nowak

Mid-Level Frontend Engineer

Berlin, Germany m.nowak@example.com +49 151 23456789

PROFILE

Polish-speaking frontend contractor with 4 years of experience building accessible, performant edtech applications in Berlin. Skilled in React, TypeScript, and modern tooling, with a track record of delivering features that boost user engagement and reduce load times.

EXPERIENCE

Frontend Engineer (Contractor), Learnify

2022 - 2022

Berlin, Germany

- Implemented a React-based lesson player that reduced average load time by 32% through code-splitting and lazy loading.
- Authored 48 unit tests with Jest, achieving 92% coverage for core UI components.
- Collaborated with UX to integrate WCAG-AA keyboard navigation, raising accessibility score from 78 to 94 in automated audits.

Frontend Engineer (Contractor), SkillHub

2022 - 2022

Berlin, Germany

- Migrated legacy jQuery dashboard to a TypeScript-React stack, cutting bug-fix cycle from 2 weeks to 3 days.
- Designed a reusable component library (Storybook) adopted by three internal teams, saving ~150 developer-hours per quarter.
- Optimized bundle size via Webpack 5 tree-shaking, decreasing initial payload by 1.8 MB.

Frontend Engineer (Contractor), Edusoft

2023 - 2023

Berlin, Germany

- Led the rollout of a real-time collaborative whiteboard using React and WebSocket, increasing daily active users by 21% within two months.
- Introduced automated visual regression testing with Chromatic, reducing UI-related hotfixes by 40%.
- Mentored two junior contractors on React best practices and TypeScript strict mode.

Mid-Level Frontend Engineer (Contractor), Edutech Solutions

2023 - Present

Berlin, Germany

- Owned the frontend for a K-12 analytics portal, delivering 12+ feature releases that drove a 18% rise in teacher retention metrics.
- Implemented server-side rendering with Next.js, improving SEO-driven organic traffic by 27%.
- Conducted bi-weekly accessibility audits; fixed 63 issues, achieving AA compliance across all public pages.
- Reduced mean time to recovery (MTTR) for production incidents from 4.5 h to 1.2 h by introducing feature flags and automated rollback pipelines.
