

Sanne Lindberg

Principal Platform Engineer

Bangalore, India · sanne.lindberg@example.com · +91 98765 43210

Principal Platform Engineer with 20 years of experience building reliable, scalable platforms for industrial automation. Dutch-speaking freelancer who mixes part-time client work with longer contracts, delivering cloud-native solutions that integrate legacy PLC/SCADA systems.

EXPERIENCE

2020 - Present

Freelance Platform Engineer

Self-employed, Bangalore, India

- Designed and operated Git-Ops pipelines (ArgoCD + Flux) that cut deployment latency by 40 % across 12 manufacturing sites.
- Automated unit- and integration-testing for IEC 61131-3 PLC code, reducing bug escape rate by 25 %.
- Migrated a legacy SCADA system to a hybrid Azure-edge architecture, saving the client $\approx$ \$1.2 M in yearly OPEX.
- Led a team of five contractors to deliver a real-time OEE dashboard for 30+ machines, raising overall equipment effectiveness by 15 %.

2018 - 2020

Part-time Platform Engineer

Siemens India, Pune, India

- Implemented Prometheus-Grafana monitoring for 200+ edge gateways, improving mean-time-to-detect from 45 min to 8 min.
- Authored internal Terraform module library adopted by three other Siemens business units.

2015 - 2018

Contract Platform Engineer

ABB India, Chennai, India

- Built a Kubernetes-based micro-services platform to replace monolithic MES adapters, increasing release frequency from monthly to weekly.
- Integrated OPC UA brokers with MQTT bridges, enabling secure data flow from 500+ field devices to cloud analytics.

2010 - 2015

Senior Platform Engineer

Bosch India, Coimbatore, India

- Introduced Helm charts for all internal services, cutting average release rollout time by 60 %.
- Mentored four junior engineers; two were promoted within 18 months.

2008 - 2010

Platform Engineer

Tata Consultancy Services, Mumbai, India

- Developed Bash-Python automation for provisioning bare-metal servers in a private OpenStack cloud.
- Participated in a cross-functional Scrum team delivering a batch-processing platform for automotive clients.

EDUCATION

2008

B.Eng. Electrical Engineering,
Universidad de Zaragoza (UZ)

SKILLS

Technical

Kubernetes · Docker · AWS · Azure · PLC programming (IEC 61131-3) · SCADA · OPC UA
· MQTT · Python · Go · CI/CD (Jenkins, GitLab) · Terraform · Prometheus · Grafana ·
Linux · Bash · GitOps · Helm

Languages

Dutch (native) · English (fluent) · Spanish (basic) · Hindi (conversational)
