

Alexi Nurmi

Junior Accessibility Specialist

Helsinki, Finland alexi.nurmi@example.com +358 40 123 4567

PROFILE

Accessibility specialist with a background in front-end development, focused on making digital products usable for people with disabilities. Experienced in WCAG 2.2 audits, assistive-technology testing, and inclusive design workshops.

EXPERIENCE

Junior Accessibility Specialist, Nordic Digital Agency

2024 - Present

Helsinki, Finland

- Conducted WCAG 2.2 AA audits on 12 client websites, identifying an average of 34 violations per site and providing remediation guidance that reduced critical issues by 78% after fixes.
- Created and delivered monthly accessibility training workshops for cross-functional teams, increasing the number of designers and developers who could correctly implement ARIA roles from 31% to 64% over six months.
- Built a reusable React component library with built-in keyboard navigation and screen-reader labels, adopted by three internal products and decreasing accessibility-related bug reports by 42%.
- Collaborated with UX researchers to run moderated usability tests with six participants using assistive technologies, synthesizing findings into actionable backlog items that improved task success rates from 58% to 81%.
- Automated regression testing using axe-core integrated into CI pipelines, catching 95% of new accessibility violations before merge to main branch.

Front-end Developer (Contract), Freelance

2022 - 2024

Remote (Finland-based)

- Implemented responsive front-ends for three e-commerce startups using React and Tailwind CSS, achieving Lighthouse performance scores above 90 on mobile.
- Added ARIA live regions and focus management to custom modal components, resulting in zero accessibility complaints from users during post-launch surveys.
- Maintained an average weekly velocity of 13 story points across multiple concurrent contracts while communicating progress via weekly async updates.

Student – Information Technology (B.Sc.), Helsinki University of Applied Sciences

2018 - 2022

Helsinki, Finland

- Graduated with a focus on human-computer interaction; thesis titled “Evaluating the Impact of ARIA Labels on Task Completion for Screen-Reader Users” received a grade of 5/5.
- Worked as a teaching assistant for the “Web Accessibility” course, grading labs and providing feedback to 40+ students per semester.

EDUCATION

Bachelor of Science in Information Technology in Human-Computer Interaction

2022

Helsinki University of Applied Sciences (Haaga-Helia UAS)
