

Elena Zapater

Junior Security Engineer

Zaragoza, Spain • elena.zapater.sec@gmail.com • +34 671 492 815

Junior security engineer specialising in vulnerability assessment and application hardening for digital health applications. Delivers freelance security assessments, ENS compliance gap reviews, and automated CI/CD security scanning for telehealth and clinical data startups.

EXPERIENCE

2025 - Present	Freelance Junior Security Engineer Self-Employed (Freelance Security Consultant), Zaragoza, Spain - Delivered web application and API security audits for two Aragon-based telemedicine startups, discovering and validating 18 OWASP vulnerabilities prior to public release. - Implemented automated vulnerability and secret scanning using Trivy and GitGuardian within GitLab CI pipelines across 4 client repositories. - Helped an electronic prescription platform map authentication and logging controls against the Esquema Nacional de Seguridad (ENS) intermediate baseline.
2025 - 2025	Junior Security Tester (Part-time Contractor) MedData Safe, Zaragoza, Spain - Conducted authorization and parameter-tampering tests on FHIR-compliant patient data ingest endpoints using Burp Suite and Postman. - Monitored and triaged security alerts across 15 cloud-hosted Linux application servers using Wazuh HIDS, reducing false-positive notifications by 25% through log filter tuning. - Authored structured remediation tickets and technical reports for frontend and backend development teams to patch broken access control flaws.

EDUCATION

2025	Bootcamp Diploma, Cybersecurity & Ethical Hacking KeepCoding Tech School (KeepCoding)
