

Maarten de Jong

Principal QA Engineer

Seville, Spain | maarten.dejong@outlook.es | +34 954 81 29 40

SUMMARY

Principal Quality Engineer with 16 years in software testing following an early background in hotel operations and hospitality management. Specialises in large-scale e-commerce test automation architectures, load simulation, and contract testing across distributed microservices. Focuses on embedding quality engineering into continuous deployment pipelines to eliminate production regressions.

TECHNICAL SKILLS

- Playwright
- Cypress
- Selenium WebDriver
- k6
- Gatling
- Pact (Contract Testing)
- TypeScript
- Python
- Postman / Newman
- GitHub Actions
- Docker
- TestRail
- Chaos Mesh
- Quality Engineering Strategy

EXPERIENCE

Principal QA Engineer - MercadoSol Marketplace

Seville, Spain

- Architected an end-to-end multi-region test framework using Playwright and TypeScript across checkout, catalogue, and vendor portal services, executing 4,200+ scenarios in under 18 minutes via parallelised runners.
- Established enterprise consumer-driven contract testing with Pact across 38 microservices, reducing breaking API integration incidents by 74% over two years.
- Standardised peak-event performance validation with k6 and Chaos Mesh, ensuring uninterrupted checkout flow during Black Friday promotions with 65,000 peak concurrent users.

Lead QA Automation Engineer - Andalucía Retail Solutions

Seville, Spain

- Led a QA chapter of 9 test engineers supporting web and mobile storefront platforms across European retail clients.
- Replaced legacy Selenium test suites with Cypress and Postman automated regression suites, cutting pipeline execution time from 90 minutes to 22 minutes.
- Introduced visual regression testing tools to the frontend release pipeline, catching over 300 UI defects prior to staging deployment.

Senior QA Engineer - Viajes Bética Online

Seville, Spain

- Built automated regression and booking engine load tests using Gatling and Java, scaling test coverage from 35% to 82% across high-volume flight and hotel reservation APIs.
- Collaborated with SREs to integrate performance regression thresholds into Jenkins CI builds, halting deployments exceeding latency targets.

QA Engineer - SoTech QA Labs

Madrid, Spain

- Transitioned into software testing from hospitality management, executing manual, exploratory, and basic automated testing for early regional e-commerce storefronts.
- Authored over 1,500 test cases covering payment gateway integrations and inventory management modules.

2010 - 20122012 - 20162016 - 20212021 - Present

Front Office Operations Supervisor - Hotel Occidental Castellana

2004 - 2010

Madrid, Spain

- Supervised front desk shift operations, guest problem resolution, and reservation database integrity for a 280-room hotel.
- Liaised with property management software vendors during system migrations and user acceptance testing phases.

EDUCATION

Diplomatura, Gestión y Administración de Empresas Turísticas

Universidad Politécnica de Madrid (UPM), 2004
