

Marta Salazar

Junior Data Analyst

Sevilla, Spain | marta.salazar@example.com | +34 600 112 233

SUMMARY

Recent graduate with a strong foundation in statistical analysis and data visualization, seeking to turn raw data into actionable insights for business stakeholders.

TECHNICAL SKILLS

- SQL
- Python (pandas, NumPy, matplotlib, seaborn)
- R (tidyverse, ggplot2)
- Tableau
- Power BI
- Excel (advanced)
- Git
- Basic statistics

EXPERIENCE

Data Analysis Intern - Instituto de Estadística de Andalucía

2024 - 2025

Sevilla, Spain

- Cleaned and validated survey datasets of up to 200k records using Python and SQL, reducing missing values by 18%.
- Built automated Tableau dashboards that visualized key socioeconomic indicators for regional policymakers, cutting report preparation time from 5 days to 4 hours.
- Assisted in conducting A/B tests on public service websites, interpreting results with chi-square and t-tests to recommend UI changes that increased click-through by 12%.
- Presented findings to a cross-functional team of 12 stakeholders, translating technical results into plain-language recommendations.

Data Analyst Contractor - Freelance

2025 - Present

Remote (Sevilla base)

- Delivered three end-to-end analytics projects for local SMEs, each involving data extraction from POS systems, cleaning in Python, and KPI reporting in Power BI.
- Increased a retail client's inventory turnover by 9% through a custom stock-level forecasting model (ARIMA) implemented in R.
- Trained client staff on basic data literacy, covering Excel pivot tables and introductory SQL queries.

EDUCATION

B.Sc. in Mathematics, Applied Mathematics

Universidad de Sevilla (US), 2024
