

Nikolaos Papadopoulos

Principal Cloud Architect

Athens, Greece · nikolaos.papadopoulos@example.com · +30 69x xxx xxxx

Principal Cloud Architect with 10+ years of experience designing scalable, cost-effective cloud platforms and leading cross-functional teams to deliver reliable infrastructure at scale.

EXPERIENCE

2019 - Present

Principal Cloud Architect

NebulaCloud Solutions, Athens, Greece

- Designed and migrated a legacy monolith to a multi-region Kubernetes-based platform, cutting average latency by 38 % and reducing infrastructure costs €210k per year.
- Implemented IaC with Terraform and GitOps workflows, raising deployment frequency from weekly to daily and lowering MTTR from 4.2 h to 22 minutes.
- Led a cross-team cost-optimization initiative that identified over-provisioned resources, saving €450k in the first year.
- Built a centralized observability stack (Prometheus, Grafana, Loki) that improved incident detection time by 65 % and reduced alert fatigue by 40 %.
- Mentored six junior engineers; two were promoted to mid-level within twelve months.

2015 - 2019

Senior Cloud Engineer

Aether Hosting, Athens, Greece

- Architected a hybrid cloud solution linking on-premise VMware workloads to AWS Direct Connect, improving data transfer throughput by 2.3×.
- Automated patching and hardening of 300+ Linux hosts using Ansible, reducing critical CVE exposure from 12 % to <1 % within three months.
- Designed a multi-tenant billing portal integrated with AWS Cost Explorer, enabling real-time chargeback for 15 enterprise customers.
- Conducted quarterly disaster-recovery drills achieving RTO < 30min and RPO < 5 min for critical services.

2012 - 2015

Cloud Engineer

Hyperion Telecom, Athens, Greece

- Deployed the company's first OpenStack-based private cloud, supporting 5 000+ virtual machines for internal SaaS products.
- Created self-service provisioning portal using Horizon and Django, cutting average VM request fulfillment from 2 days to 15 minutes.
- Implemented Ceph storage backend with erasure coding, achieving 99.999 % durability and 20 % lower storage TCO.

EDUCATION

2012

Diploma in Electrical and Computer Engineering, Computer Engineering

National Technical University of Athens (NTUA) (NTUA)

SKILLS

Technical	Kubernetes · Terraform · GitOps (Argo CD, Flux) · AWS (EC2, EKS, RDS, S3, CloudFront) · GCP (GKE, Cloud SQL, Cloud Storage) · Observability (Prometheus, Grafana, Loki, Tempo) · CI/CD (GitHub Actions, Jenkins) · Infrastructure as Code · Cost optimization · Technical mentoring · Linux/Unix systems · Networking (VPC, Load Balancing, Service Mesh)
Languages	Greek (native) · English (fluent, C1) · German (intermediate, B1)
