

Priya Desai

Mid-level Machine Learning Engineer

Machine learning engineer with experience building and deploying production-grade models for recommendation systems and anomaly detection. Strong background in Python, deep-learning frameworks, and cloud-native MLOps.

EXPERIENCE

Machine Learning Engineer

TechNova Solutions – Amsterdam, Netherlands – 2021 - Present

- Reduced model inference latency by 35% through TensorRT optimization and batch-size tuning, saving $\approx$ 120 compute-hours per month
- Built a feature-store pipeline using AWS Glue and Athena that increased training-data throughput by 50%, enabling two extra experiment cycles per week
- Implemented automated data-drift detection with Evidently AI, cutting average detection time from 3 days to 4 hours
- Mentored three junior engineers; team velocity rose by $\sim$ 20% as measured by story points completed per sprint
- Authored two internal tech talks on MLOps best practices, attended by >40% of the engineering org

Data Science Bootcamp Graduate

DataCamp Bootcamp (Le Wagon) – Remote – 2020 - 2020

- Completed a 9-week full-time data science bootcamp; final project - a churn-prediction model achieving ROC-AUC 0.91 on a telco dataset
- Acquired hands-on experience with pandas, scikit-learn, Flask, and basic CI pipelines

EDUCATION

B.Tech in Computer Science, Computer Science

Pune University (PU) – 2018

CONTACT

Amsterdam, Netherlands

priya.desai@example.com

SKILLS

Python TensorFlow PyTorch
Scikit-learn SQL
AWS (S3, SageMaker, Lambda)
Docker Kubernetes MLflow
Git CI/CD (GitHub Actions)

LANGUAGES

English - fluent
Hindi - native
Dutch - A2 (basic)
