

Antoine Moreau

Staff Machine Learning Engineer

Valencia, Spain | antoine.moreau@example.com | +34 600 123 456

SUMMARY

Freelance ML engineer specializing in adtech predictive modeling and real-time bidding optimization. Experienced in end-to-end MLOps, from data pipelines to model deployment, with a track record of improving ROI and reducing CPA for digital advertising campaigns.

TECHNICAL SKILLS

- Python
- TensorFlow
- PyTorch
- SQL
- AWS SageMaker
- Kafka
- Feature Store
- MLflow
- A/B testing
- Bayesian optimization
- Docker
- GitLab CI

EXPERIENCE

Machine Learning Engineer (contract) - Freelance

2015 - Present

Remote (clients in Spain, France, Germany)

- Built CTR prediction models that lifted campaign ROI by 18% for AdNova (2012-2015) and continued similar work for multiple adtech clients.
- Designed a feature store using AWS SageMaker and Kafka, reducing feature engineering time by 40%.
- Authored an internal MLOps best-practice guide adopted by five adtech firms, cutting model deployment time from two weeks to three days.

Machine Learning Engineer - AdNova

2012 - 2015

Madrid, Spain

- Delivered a real-time bidding model that reduced cost per acquisition by 22% for a major e-commerce client (2023).
- Implemented Bayesian optimization for hyperparameter tuning, improving model AUC by 0.03 across 10 campaigns.
- Mentored two junior data scientists, overseeing their project delivery and code reviews.

Junior Data Scientist - ClickBoost

2010 - 2012

Barcelona, Spain

- Built an A/B testing framework that increased click-through rates by 12% across five campaigns.
- Automated data extraction pipelines using Python and Airflow, cutting daily reporting latency from 4 hours to 20 minutes.
- Presented weekly performance insights to stakeholders, translating technical findings into actionable marketing recommendations.

EDUCATION

MSc in Machine Learning, Computer Science

KTH Royal Institute of Technology (KTH), 2010

LANGUAGES

French (native)

English (fluent)

Spanish (intermediate)
