

Lucy Dubois

Director, Data Engineer

Lyon, France lucy.dubois@example.com +33 6 12 34 56 78

PROFILE

Director-level data engineer with 19 years of experience building scalable data pipelines and analytics platforms in the energy sector. Proven track record of leading freelance teams, cutting costs, and delivering real-time insights for grid operations.

EXPERIENCE

Freelance Data Engineering Consultant, Self-employed

2022 - Present

Lyon, France

- Designed and deployed a real-time SCADA data ingestion pipeline processing 2.5M sensor readings/day, reducing latency from 15 min to under 30 sec.
- Led a cross-functional team of 5 freelancers to build a data lake on AWS S3, cutting storage costs by 40 % and enabling self-service analytics for 150+ users.
- Implemented data quality checks using Great Expectations, decreasing erroneous records by 92 % and saving ~€200k annually in rework.

Part-time Data Pipeline Engineer, EDF Renewables

2020 - 2021

Lyon, France

- Orchestrated nightly ETL jobs for wind-farm SCADA data, improving data freshness to hourly intervals.
- Reduced pipeline failure rate by 70 % through automated monitoring and alerting.

Contract Data Architect, TotalEnergies

2018 - 2020

Paris, France

- Migrated legacy Informatica ETL jobs to Apache Spark, boosting throughput 3× and saving 25 hrs/week of operational overhead.
- Designed a unified data model for downstream trading analytics, adopted by three business units.

Freelance Data Engineer, Various startups (remote)

2015 - 2018

Remote

- Built real-time analytics dashboards for IoT energy-metering platforms using Python, Flask, and D3.js.
- Consulted on GDPR-compliant data handling practices for EU-based clients.

Junior Data Engineer, Siemens Energy

2011 - 2014

Munich, Germany

- Supported migration of SAP-based energy-consumption data to a Hadoop-based lake.
- Authored internal documentation on data-lineage tracking adopted by the EMEA data team.

Intern, KTH Data Lab

2010 - 2010

Stockholm, Sweden

- Assisted in research on stream processing for smart-grid fault detection.
- Co-authored a conference paper presented at IEEE SmartGridComm 2010.

EDUCATION

MSc Data Engineering in Computer Science2005

KTH Royal Institute of Technology (KTH)

SKILLS

Data Engineering · ETL/ELT · SQL · Python · Apache Spark · Kafka · AWS (S3, Glue, Redshift) · GCP (BigQuery, Dataflow) · Data Modeling · Data Governance · Tableau · Power BI · SCADA Systems · Energy Domain Knowledge · Git · Docker · Kubernetes

LANGUAGES

English (Native) · French (Fluent) · Swedish (Basic)
